

Travel More Application Manual Tests

Table of Contents

1. User Registration:

- Test Case 1: Register a new user with valid credentials.
- Test Case 2: Attempt to register with an email that's already in use.
- Test Case 3: Register with a weak password (less than 8 characters).
- Test Case 4: Register with a password lacking complexity (no uppercase, lowercase, digit, or special character).

2. User Login:

- Test Case 1: Login with valid credentials.
- Test Case 2: Login with invalid credentials (wrong password).
- Test Case 3: Login with a non-existent user.

3. Authentication Token Handling:

- Test Case 1: Verify that a valid authentication token is generated upon successful login.
- Test Case 2: Ensure that the authentication token is included in subsequent requests after login.
- Test Case 3: Attempt to access protected endpoints without a valid token (expect redirection or error).
- Test Case 4: Attempt to access protected endpoints with an expired token (expect redirection or error).

4. Main Page (/main):

- Test Case 1: Access the main page with a valid authentication token.
- Test Case 2: Access the main page without a valid authentication token (expect redirection or error).
- Test Case 3: Verify that the main page displays the user's trips correctly.

5. Explore Page (/explore):

- Test Case 1: Access the explore page with a valid authentication token.
- Test Case 2: Access the explore page without a valid authentication token (expect redirection or error).
- Test Case 3: Verify that the explore page displays all trips correctly.

6. Adding a new trip:

- Test Case 1: Add a new trip with valid inputs and without images.
- Test Case 2: Add a new trip with missing inputs.
- Test Case 3: Add a new trip with end date before start date.

7. Image Upload:

- Test Case 1: Upload images when creating a new trip.

8. Trip Card Page (/tripcard):

- Test Case 1: Access a trip card page with a valid authentication token.
- Test Case 2: Access a trip card page without a valid authentication token (expect redirection or error).
- Test Case 3: Verify that the trip card page displays trip details correctly.

9. User Profile Page (/profile/{userId}):

- Test Case 1: Access a user profile page with a valid authentication token.
- Test Case 2: Access a user profile page without a valid authentication token (expect redirection or error).
- Test Case 3: Verify that the user profile page displays user's trips correctly.
- Test Case 4: Select a new profile picture.
- Test Case 5: Verify possibility to change profile picture again.

Travel More Application Manual Tests

10. Offers Page (/offers):

- Test Case 1: Access the offers page with a valid authentication token.
- Test Case 2: Access the offers page without a valid authentication token (expect redirection or error).
- Test Case 3: Verify that the offers page displays join requests correctly.

11. Join Requests Handling:

- Test Case 1: Send a join request to join a trip.
- Test Case 2: Accept a join request as the trip owner.
- Test Case 3: Decline a join request as the trip owner.
- Test Case 4: Verify that many users can join the trip.

12. Commenting Trips:

- Test Case 1: Add a comment in the trip card.
- Test Case 2: Verify that many comments can be added.

Travel More Application Manual Tests

1. User Registration:

- Test Case 1: Register a new user with valid credentials.

Fill valid credentials ⇒ Press “Register”

The screenshot shows a registration form titled "Register". It contains three input fields: "Username" with the value "User Example", "Email" with the value "example@example.com", and "Password" with the value "*****". Below the inputs is a blue "Register" button.

⇒ Check no Error returned ⇒ Check New User (with default profile picture in column “url”) was added to Database

	user_id	url	user_email	user_name	user_password

Fill invalid credentials(wrong password) ⇒ Press “Log In”

The screenshot shows a "Log In" form with two fields: "Email" containing "example@example.com" and "Password" containing a series of dots. A blue "Log In" button is at the bottom.

⇒ Check Error Page returned

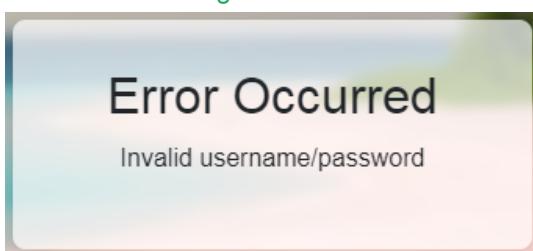

- Test Case 3: Login with a non-existent user.

Fill invalid credentials(non-existent user) ⇒ Press “Log In”

The screenshot shows a "Log In" form with two fields: "Email" containing "nonexisting@example.com" and "Password" containing a series of dots. A blue "Log In" button is at the bottom.

⇒ Check Error Page returned

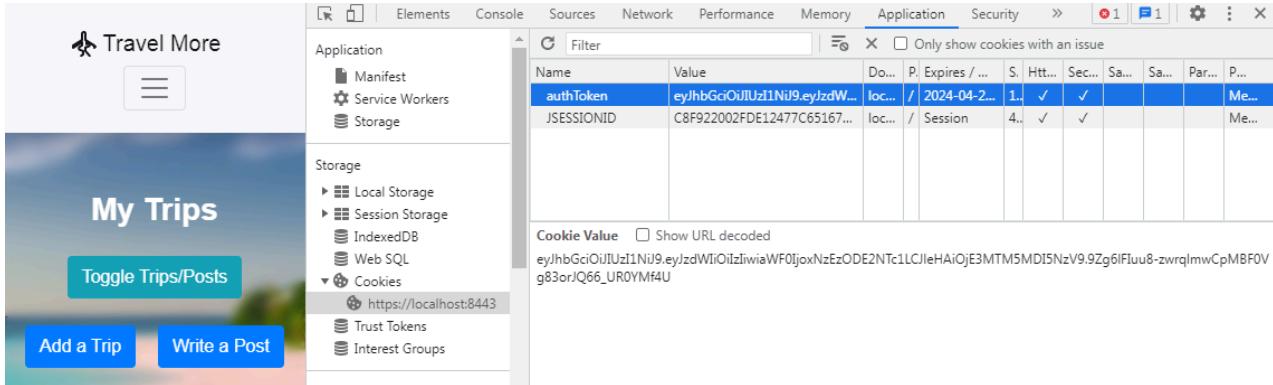

Travel More Application Manual Tests

3. Authentication Token Handling:

- Test Case 1: Verify that a valid authentication token is generated upon successful login.

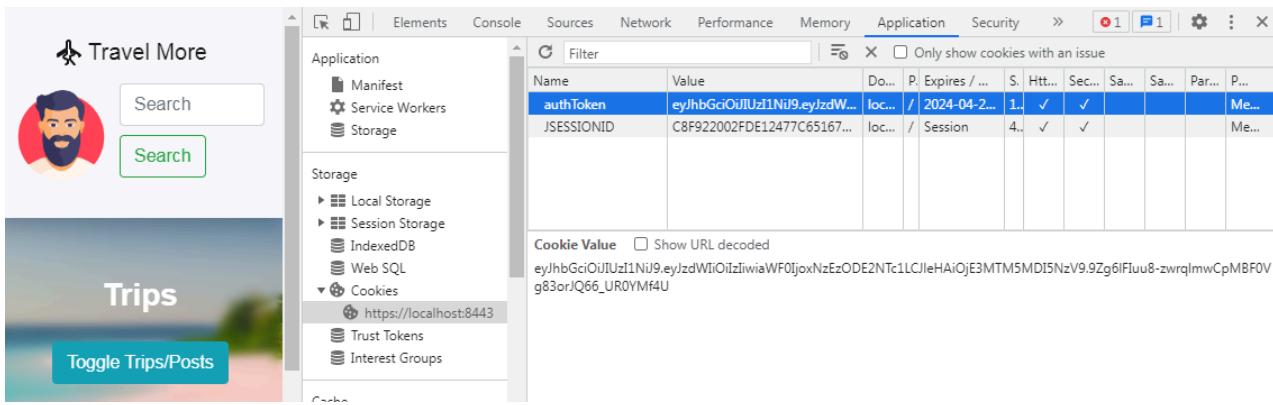

Login with valid credentials ⇒ Verify that a valid authentication token is generated upon successful login

The screenshot shows the 'Travel More' application interface with the 'My Trips' section visible. Below it, there are buttons for 'Add a Trip' and 'Write a Post'. To the right, the browser's developer tools are open, specifically the 'Application' tab under 'Storage'. The 'Cookies' section is expanded, showing two entries: 'authToken' and 'JSESSIONID'. The 'authToken' cookie has a value of 'eyJhbGciOiJIUzI1NiJ9.eyJzdW...' and an expiration date of '2024-04-2...'. The 'JSESSIONID' cookie has a value of 'C8F922002FDE12477C65167...' and is set to 'Session'. A detailed view of the 'authToken' cookie shows its value as 'eyJhbGciOiJIUzI1NiJ9.eyJzdWl...'. The developer tools also show the URL 'https://localhost:8443'.

- Test Case 2: Ensure that the authentication token is included in subsequent requests after login.

Login with valid credentials ⇒ Ensure that the authentication token is included in subsequent requests after login

The screenshot shows the 'Travel More' application interface with the 'Trips' section visible. Below it, there are buttons for 'Toggle Trips/Posts' and 'Search'. To the right, the browser's developer tools are open, specifically the 'Application' tab under 'Storage'. The 'Cookies' section is expanded, showing the same 'authToken' and 'JSESSIONID' cookies as the previous screenshot. The 'authToken' cookie has a value of 'eyJhbGciOiJIUzI1NiJ9.eyJzdW...' and an expiration date of '2024-04-2...'. The 'JSESSIONID' cookie has a value of 'C8F922002FDE12477C65167...' and is set to 'Session'. A detailed view of the 'authToken' cookie shows its value as 'eyJhbGciOiJIUzI1NiJ9.eyJzdWl...'. The developer tools also show the URL 'https://localhost:8443'.

- Test Case 3: Attempt to access protected endpoints without a valid token (expect redirection or error).

Login with valid credentials ⇒ Delete authentication token ⇒ Attempt to access protected endpoints without a valid token => Check Error Page returned

Travel More Application Manual Tests

The screenshot shows the Travel More application interface. A modal window displays the message "Error Occurred" and "Authorization token expired. Please login!". In the background, there's a blurred view of a travel-related image. On the right side of the screen, the developer tools are open, specifically the Application tab. The Cookies section is expanded, showing a table with one row:

Name	Value	D.	P.	Expires...	S.	H.	S..	S..	P..	M..
JSESSIONID...	C8F922002FDE...	...	/	Sessi...	4.	✓	✓			

A tooltip "Select a cookie to preview its value" points to the "Value" column of the first row. Below the Application tab, the Cache tab is also visible.

- Test Case 4: Attempt to access protected endpoints with an expired token (expect redirection or error).
Login with valid credentials ⇒ Set authToken expiration time in 1 minute

The screenshot shows the Travel More application interface. The main page is titled "My Trips" and features buttons for "Toggle Trips/Posts", "Add a Trip", and "Write a Post". On the right side, the developer tools Application tab is open, showing the Cookies section with two entries:

Name	Value	Do...	P.	Expires...	S.	Htt...	Sec...	Sa...	Par...	P...
authToken	eyJhbGciOiJIUzI1NiJ9.eyJzdW...	loc...	/	2024-04-2...	1-	✓	✓			Me...
JSESSIONID	C8F922002FDE12477C65167...	loc...	/	Session	4..	✓	✓			Me...

A tooltip "Cookie Value" is visible above the table, with the value "eyJhbGciOiJIUzI1NiJ9.eyJzdWl...". Below the table, there's a note: "Show URL decoded eyJhbGciOiJIUzI1NiJ9.eyJzdWl...".

⇒ After 1 minute attempt to access protected endpoints with an expired token => Check Error Page returned

The screenshot shows the Travel More application interface. A modal window displays the message "Error Occurred" and "Authorization token expired. Please login!". In the background, there's a blurred view of a travel-related image. On the right side of the screen, the developer tools are open, specifically the Application tab. The Cookies section is expanded, showing a table with one row:

Name	Value	D.	P.	Expires...	S.	H.	S..	S..	P..	M..
JSESSIONID...	C8F922002FDE...	...	/	Sessi...	4.	✓	✓			

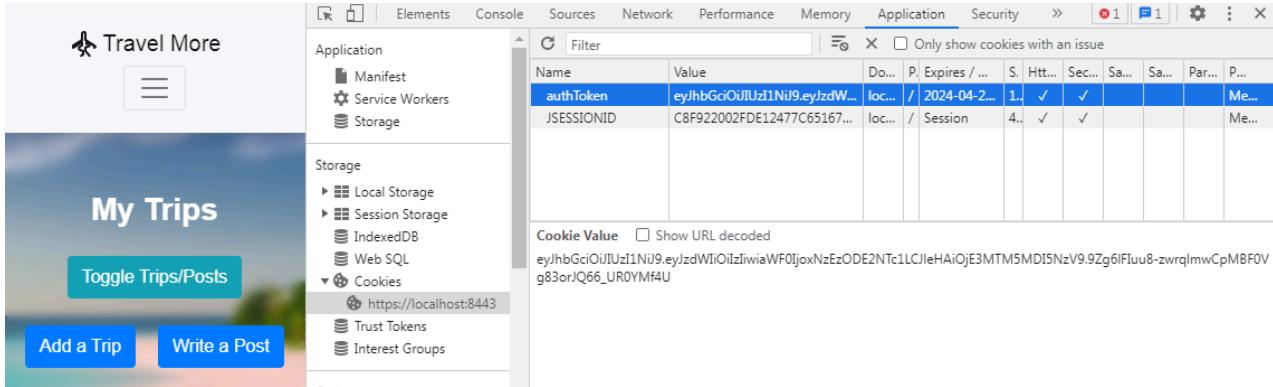

A tooltip "Select a cookie to preview its value" points to the "Value" column of the first row. Below the Application tab, the Cache tab is also visible.

Travel More Application Manual Tests

4. Main Page (/main):

- Test Case 1: Access the main page with a valid authentication token.

Login with valid credentials ⇒ Access the main page with a valid authentication token

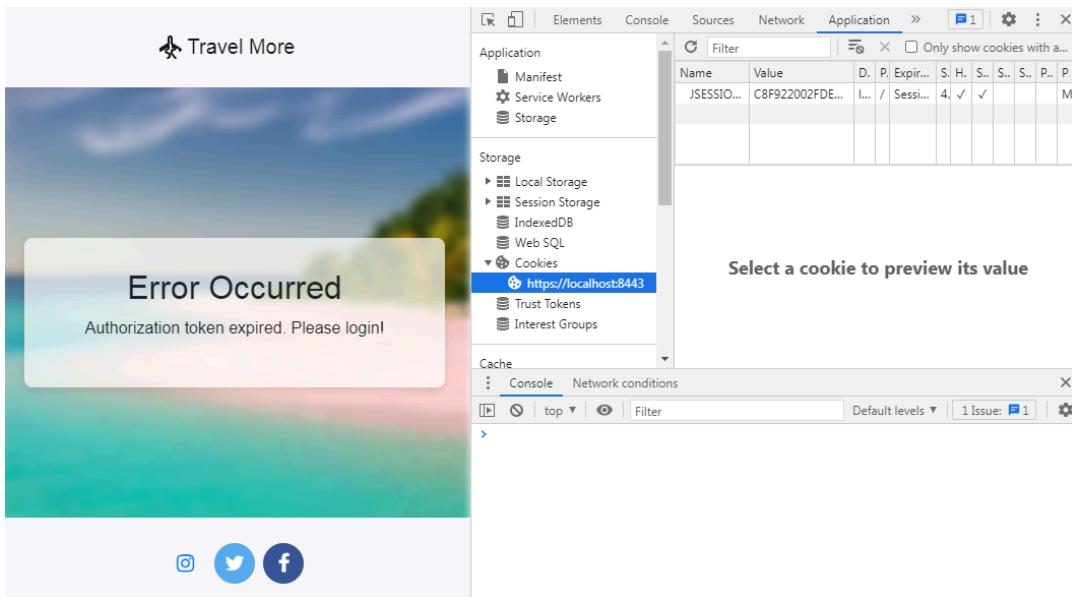

The screenshot shows the Chrome DevTools Application tab open. The left sidebar lists 'Application' (Manifest, Service Workers, Storage), 'Storage' (Local Storage, Session Storage, IndexedDB, Web SQL, Cookies), and 'Cache' (Console, Network conditions). The 'Cookies' section under Storage is expanded, showing two entries:

Name	Value	Do...	P...	Expires / ...	S...	Htt...	Sec...	Sa...	Sa...	Par...	P...
authToken	eyJhbGciOiJUzI1Ni9eyJzdW...	loc...	/	2024-04-2...	1,	✓	✓				Me...
JSESSIONID	C8F922002FDE12477C65167...	loc...	/	Session	4,	✓	✓				Me...

Below the table, the 'Cookie Value' field contains the decoded value: eyJhbGciOiJUzI1Ni9eyJzdWlraWFOjoxNzEzODE2NTc1LCJleHAiOjE3MTM5MDI5NzV9.9Zg6Ifiuu8-zwrqlmwCpMBF0Vg83orJQ66_UR0YMF4U

- Test Case 2: Access the main page without a valid authentication token (expect redirection or error).

Login with valid credentials ⇒ Delete authToken ⇒ Access the main page without a valid authentication token
⇒ Check Error Page returned

The screenshot shows the Chrome DevTools Application tab open. The left sidebar lists 'Application' (Manifest, Service Workers, Storage), 'Storage' (Local Storage, Session Storage, IndexedDB, Web SQL, Cookies), and 'Cache' (Console, Network conditions). The 'Cookies' section under Storage is expanded, showing one entry:

Name	Value	D...	P...	Expir...	S...	H...	S...	S...	P...	M...
JSESSIONID	C8F922002FDE...	loc...	/	Session	4,	✓	✓			Me...

A message 'Select a cookie to preview its value' is displayed below the table. The main content area shows an 'Error Occurred' dialog box with the message 'Authorization token expired. Please login!'.

Travel More Application Manual Tests

- Test Case 3: Verify that the main page displays the user's trips correctly.

Login with valid credentials ⇒ Add a few trips ⇒ Verify that the main page displays the user's trips correctly

The screenshot shows the 'My Trips' section of the Travel More application. At the top, there is a navigation bar with links for Dashboard, Explore, Offers, and User Example, followed by a user profile icon. Below the navigation is a large banner with the title 'My Trips'. Underneath the banner are two trip cards. The first trip card is for 'User Example' to Palau, dated from 2024.06.01 to 2024.06.16, lasting 15 Days. The second trip card is for 'User Example' to Austria, dated from 2024.09.25 to 2024.09.29, lasting 4 Days. Each trip card has a 'Delete' button in the top right corner.

5. Explore Page (/explore):

- Test Case 1: Access the explore page with a valid authentication token.

Login with valid credentials ⇒ Access the explore page with a valid authentication token

The screenshot shows the 'Trips' section of the Travel More application. On the left, there is a search bar and a user profile icon. Below the search bar are buttons for 'Add a Trip' and 'Write a Post'. On the right, the developer tools are open, specifically the Application tab of the Network panel. It shows a table of cookies. There are two entries: 'authToken' with the value 'eyJhbGciOiJIUzI1NiJ9.eyJzdWIiOiIzliwiaWF0ljoxNzEzODE2OTM4LCJleHAiOjE3MTM5MDMzMzh9.XN2woEQbkWb99rk3zKMJZIfaSAg8JNn0a0ZVdliMLL0' and 'JSESSIONID' with the value 'C8F922002FDE12477C65167...'. The table includes columns for Name, Value, Domain, Path, Expires /..., SameSite, HttpOnly, Secure, Session, and Parameters.

Name	Value	Do...	P.	Expires / ...	S.	Http...	Sec...	Sa...	Par...	P...
authToken	eyJhbGciOiJIUzI1NiJ9.eyJzdWIiOiIzliwiaWF0ljoxNzEzODE2OTM4LCJleHAiOjE3MTM5MDMzMzh9.XN2woEQbkWb99rk3zKMJZIfaSAg8JNn0a0ZVdliMLL0	loc...	/	2024-04-2...	1..	✓	✓			Me...
JSESSIONID	C8F922002FDE12477C65167...	loc...	/	Session	4..	✓	✓			Me...

Travel More Application Manual Tests

- Test Case 2: Access the explore page without a valid authentication token (expect redirection or error).
Login with valid credentials ⇒ Delete authToken ⇒ Access the explore page without a valid authentication token
⇒ Check Error Page returned

The screenshot shows a browser window with the "Travel More" logo at the top. Below it, a modal dialog box displays the message "Error Occurred" and "Authorization token expired. Please login!". To the right of the modal, the browser's developer tools are open, specifically the "Application" tab under the "Storage" section. A table lists a single cookie named "JSESSIONID" with the value "C8F922002FDE...". The "Expires" column shows "4. / Sessi...", indicating the session has ended. The "Cache" tab is also visible at the bottom.

- Test Case 3: Verify that the explore page displays all trips correctly.
Login with valid credentials ⇒ Access the explore page ⇒ Verify that the explore page displays all trips correctly

The screenshot shows the "Explore" page of the Travel More application. At the top, there is a navigation bar with links for "Dashboard", "Explore", "Offers", and "Next User Example". Below the navigation is a search bar with a placeholder "Search" and a green "Search" button. The main content area is titled "Trips" and features a "Toggle Trips/Posts" button. There are three trip cards displayed:

- User Example** (Estonia, April 27 - April 28, 1 Day)
- User Example** (Palau, June 1 - June 16, 15 Days)
- New User Example** (Norway, August 15 - August 20, 5 Days)

Each trip card includes a thumbnail image, the trip title, location, dates, and duration.

8. Trip Card Page (/tripcard):

- Test Case 1: Access a trip card page with a valid authentication token.

Login with valid credentials ⇒ Access a trip card page with a valid authentication token

The screenshot shows the Travel More application interface. At the top, there is a navigation bar with links for Dashboard, Explore, Offers, and User Example, followed by a user profile icon. Below the navigation bar is a large, blurred background image of a landscape. In the center, there are two blue buttons: "Add a Trip" and "Write a Post". A white callout box labeled "User Example" contains travel details: "Austria", "2024.09.25 / 2024.09.29", and the text "Grab a coffee in Vienna, and let's explore!". Below this, there is a text input field with the placeholder "Write your comment:" and a "Submit" button.

- Test Case 2: Access a trip card page without a valid authentication token (expect redirection or error).

Login with valid credentials ⇒ Delete authToken ⇒ Access a trip card page without a valid authentication token
⇒ Check Error Page returned

The screenshot shows the Travel More application displaying an "Error Occurred" message: "Authorization token expired. Please login!". To the right of the application window, the browser's developer tools are open, specifically the "Application" tab. This tab shows the browser's internal storage structures. Under "Storage", the "Cookies" section is expanded, listing a cookie for the domain "https://localhost:8443" with the name "JSESSIONID" and value "C8F922002FDE...". The "Cache" tab is also visible at the bottom.

Travel More Application Manual Tests

- Test Case 3: Verify that the trip card page displays trip details correctly.

Login with valid credentials ⇒ Verify that the trip card page displays trip details correctly

The screenshot shows a mobile application interface for 'Travel More'. At the top, there is a navigation bar with a logo, 'Travel More', and links for 'Dashboard', 'Explore', 'Offers', and 'User Example'. A user profile icon is also present. Below the navigation is a large, blurred background image of a fjord landscape. In the center, there is a white rounded rectangle containing trip details. The title 'New User Example' is displayed in blue, along with a 'Send Request' button in orange. The location 'Norway' is shown in bold black text. The travel dates '2024.08.15 / 2024.08.20' are listed below. A descriptive text reads 'Sail through Majestic Fjords Beneath the Northern Lights.' Below this is a large, high-quality photograph of a fjord with mountains in the background. At the bottom, there is a comment input field with the placeholder 'Write your comment:' and a 'Submit' button.
